

Rice Associates Chartered Accountants celebrates its first year of trading from the centre of Wokingham.

Rice Associates, a local firm of Chartered Accountants, celebrates its first year of trading from its Market Place office in Wokingham. The firm works closely with local businesses, individuals and professional advisers in the community. Rice Associates believes that working from the centre of the town enhances their local presence with individuals and local businesses.

The move into Wokingham has served the firm well; we like to see our clients and develop a good working relationship. With offices on the Market Place local clients have the opportunity to drop in at their convenience. For far too long individuals and business alike have avoided contacting their accountants for fear of receiving a bill. We offer a fixed fee service which means that clients can contact us without this worry and we encourage clients to either drop in or call us to discuss issues which in many instances is in their best interests.

Rice Associates offers a free initial meeting and fixed fee quotations in advance. We want to develop strong positive and lasting relationships with clients going forward and understand that we are in uncertain times with many business and individuals suffering.

We have found that by providing fixed fees and free phone calls clients are much more willing to contact us and we can often identify areas which may need action in order to optimise any potential tax savings.

Rice Associates offers a full spectrum of compliance services including Statutory Accounts, Audit, Corporate and personal tax, bookkeeping, payroll and company secretarial services in addition to advisory and valuation services.

We're Only a Phone Call Away!

Our clients can call on us at any time, without having to worry about the cost. With the imminent tax return deadline of 31 January looming and the requirement for the returns to now be filed electronically we would encourage you to contact us should you have need for any assistance.

We Are Different to Other Accountants

We work much more closely with our clients than most firms of accountants. We want to get to know our clients' businesses inside out, enabling us to easily identify problems and spot opportunities. We want to get to know our clients' businesses, we're not here for a visit once a year. We want to identify your personal goals because research shows that businesses are more successful if the management and owners are focused on the bigger picture. We want to help improve profits and encourage growth.

Whatever we do for you, we will always carry out our work with the aim of adding value to your business.

A Popular Feature: Our Fixed Price Agreements

Once we have established your needs we can give you a guaranteed fully inclusive price from the start. This will give you peace of mind and no surprise bills.
